

## METAVVERSE

Connect to our metaverse and discover a whole virtual world of possibilities.

**Enter the anonymous and confidential care chatrooms and meet our psychologists as avatar.**

This is the perfect answer for those feeling unhappy at work but afraid to go to a psychologist's office.

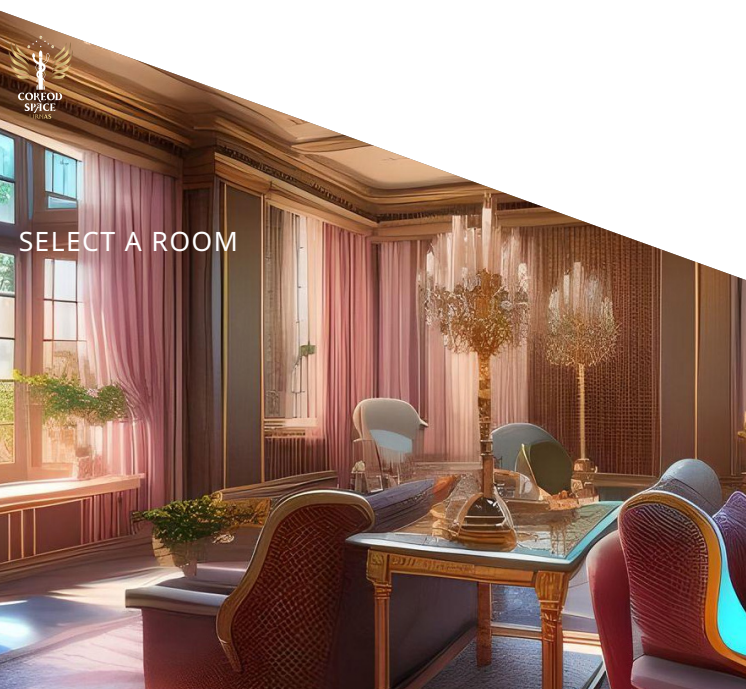

Enjoy a healing space where you are represented by an avatar, helping to reduce social anxiety and increase your motivation to talk to others.

**Our metaverse offers the opportunity for care to be accessible and affordable, wherever you are!**

As each consultation is governed by medical secrecy, consultations do not reveal the patient's identity to any member of the company.

You like our metaverse? Take part in inspiring conferences given by world-renowned experts and much more.

## COREOD ACADEMY

*Digital offer*

### COREOD ACADEMY

166 bis avenue des Champs-Élysées  
75008 Paris | France  
Contact : +33 (0)1 88 61 25 35  
E-mail : [info@coreodacademy.com](mailto:info@coreodacademy.com)

**"44% of employees were absent from their job at least once in 2022. That's almost one employee in two" \***

## COREOD SPACE

Taking care of your employees' mental health makes them more productive, more fulfilled and reduces absenteeism.

Coreod Space is the first specialized e-Mental Health facility, offering digital therapies, based on studies conducted at the Space Neuropsychology Lab (LIRNAS). Our goal is to help humans to develop the resilience of space travelers for long term travel. Our mission in this lab is to develop protocols for managing astronaut stress in space.

Part of these protocols are also used for the general public, thanks to the tools set up by Coreod Space.

## LIRNAS

The Space Neuropsychology Lab (LIRNAS) is the very first research center in the world dedicated to astronaut's and future space traveler's mental health. This research specifically studies the resilience of humans in space through the implementation of highly innovative support protocols.

## SAT

(Space Agent Traveler) As mankind prepares to return to the Moon and explore Mars, it's crucial to pay attention to the mental health of astronauts.

That's why we created SAT.

SAT is a conversational agent that serves as an avatar for a team of psychologists, to accompany and support astronauts in their time of need.

## VR\* FOR COMPANY

\*VIRTUAL REALITY

Discover our **well-being and stress management solutions for businesses.**

Set up directly in your offices, as close as possible to your employees, our relaxation and well-being area combines the comfort and intimacy of egg chairs with the immersion of our virtual reality headsets. **Give your staff access to a truly immersive bubble dedicated to stress management and well-being**, accessible at any time, with no time constraints. In the headset, Coreod Space's specially designed protocols allow you to let go and immerse yourself in a soothing world you've never experienced before.

This turnkey package is constantly being updated with new content added to the headset on a regular basis. Developed by our expert psychologists, the protocols combine the best of mental health care with cutting-edge technology.

They are specifically developed around 4 themes :

- **stress management,**
- **addictions,**
- **self-confidence and**
- **post-partum.**

Enriched by LIRNAS research, **you will benefit from the same protocols as those offered to astronauts and the most recent discoveries in the field.**

Ultimately, this solution will become an essential tool for improving the quality of life at work for all your employees.

This solution is optimal for enterprises caring about their employees' mental health with an advanced, multi-account VR software tool.

This subscription plan includes a dedicated support agent and specialized training to maximize your facility's potential with VR and troubleshoot any issues you or your employees may have with VR.
